

NUCRAFT
FLOW™ CONFERENCE

FLOW

Designed by Joey Ruiter

Flow is available in five top shapes and fourteen base styles for an endless combination of configurations. Paired with a variety of tabletop and subtop technologies, as work styles evolve, so can Flow.

DESIGN

Our most loved conference table, Flow is available in five different top shapes (rectangle, radius rectangle, boat, sightline, and round) and fourteen different base options for an endless combination of aesthetic choices for all different work styles and spaces.

POWER & TECH

Flow features the most robust selection of power and technology options of all of our conference tables. The collection offers both surface and under-surface power with optional data, ensuring a seamless connection to presentations and virtual meetings.

MATERIALS

Available in a broad palette of materials for both tabletops and bases, Flow can be customized to suit a wide range of environments—from casual meeting areas to formal boardrooms. Top materials include veneer, glass, stone, Fenix®, and laminate. Base finishes are offered in veneer, paint, fabric, leather, acrylic, and new metal base trim options in a variety of finishes.
