

Freestanding Height Adjustable Desk

NUCRAFT

Freestanding Height Adjustable Desk

The height adjustable desk is a standard capability for Aerial Refreshed, Cavara, and Merino casegoods. Includes two freestanding base styles, desk shell and T-leg, with the option to easily modify the base design to specific project requirements. Standard options include:

Merino desk shell panel legs, work surface, and modesty panel shown in Zinc Walnut veneer.

Desk shell

Rectangular desk shell with two panel legs and an inset full-height modesty panel. The lift columns are integrated within the panel legs and have an adjustment range from 29.5–45". The modesty maintains a clean and integrated aesthetic when in the raised position. Work surface ranges from 30–36" depths and 60–84" widths (in increments of 6"). Also available on Aerial Refreshed and Cavara.

Aerial edge profile work surface and modesty panel shown in Zinc Walnut veneer with Foil powdercoat T-leg.

T-leg desk

Features a rectangular T-leg metal base, rectangular work surface and an optional half-height modesty panel. Work surface ranges from 24–36" depths and 48–72" widths (in increments of 6"). Also available on Merino and Cavara.

Left to right: Aerial Refreshed desk shell panel legs, work surface, and modesty panel in Cashmere double-cut veneer, Cavara desk shell panel legs, work surface, and modesty panel shown in Chalk Quarter-cut Ash veneer.

Standard Finish Options

- Work surface: Veneer
- Metal Leg Base: Powdercoat
- Modesty Panels: Veneer or Paint
- Desk Shell Panel Legs: Veneer
