NUCRAFT INTRODUCES THE NEXT GENERATION OF POWER AND DATA

CHICAGO – June 15, 2015 – Nucraft today introduced Power Matrix at NeoCon 2015. Nucraft's most versatile power option, Power Matrix incorporates an array of scalable features and is available across multiple product lines.

Available in a variety of sizes, styles and connectivity options, Power Matrix is offered in two single-sided units and two double-sided units that provide two to eight power outlets and three to 12 Extron AAP faceplates.

Power Matrix features a bezel-free, flush-mount when applied to veneer tabletops and a slim-profile bezel when added to laminate, glass or stone tops.

Direct plug-in or hardwired in-feed options add flexibility while a standard UK option addresses most international power requirements. Power Matrix doors are offered in metal, glass and grain-matched wood.
