Laminate Top / Metal Door

Stone Top / Metal Door
Round tables only

Power Rail

Tech Node

4-Port Power Rail

DESIGN

Two4Six conference, meeting, and media tables support collaboration and provide the perfect option for any space. With multiple height options, Two4Six offers solutions in applications that range from conference rooms and team project rooms, to collaborative and huddle spaces in open floorplans.

POWER & TECH

Two4Six offers a choice of table top and sub top power/AV options. Power Matrix is filled with a broad array of high-performance features and refined aesthetic elements, such as door options in veneer, glass, or metal. Power Matrix units on veneer tables have no bezel and the veneer door is made with grain-matched wood cut from the same table top. Available with USB-A+C charger option.

MATERIALS

Two4Six is available in a wide range of material options to create different aesthetics ranging from a mixed material look, specifying tables with the metal open frame or metal post legs or painted racetrack base, to a more traditional look with a racetrack base and top in all veneer or laminate materials. Glass tops on conference tables provide an elegant look. Stone and quartz are available on round, square, and soft square meeting tables.
